John Addison

Director

Edmonton, AB

Overview	John is a seasoned construction and insurance professional with over 20 years of experience spanning field operations, technical consulting, and executive leadership. With a foundation in carpentry and a proven track record as a General Manager, he brings hands-on expertise and strategic oversight into high-stakes property and industrial claims.
	Throughout his career, John has led the response and resolution of numerous catastrophic (CAT) losses, large-loss claims, and complex insurance cases across Canada. His leadership has been pivotal in managing large-scale restoration projects following wildfires, floods, and structural failures—coordinating multidisciplinary teams, streamlining workflows, and facilitating communication between insurers, adjusters, and contractors.
	His core strengths include complex cost analysis, bid development, code compliance, and liability mitigation. John has managed high volumes of claims, often overseeing dozens of files with evolving scopes and multiple stakeholders. His ability to navigate intricate scenarios and deliver accurate, defensible valuations has made him a trusted advisor in the insurance and construction sectors.
	He currently leads a team of senior consultants across Alberta, delivering specialized valuation, cost consulting, and large-loss advisory services. Known for his precision, leadership, and strategic mindset, John continues to drive excellence in complex claims resolution and post-disaster recovery.
